MATRIX42 MARKETPLACE PRODUCTS
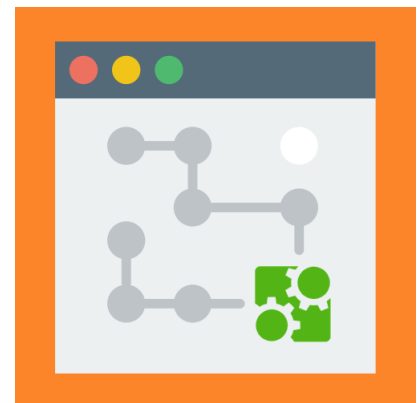

BPMN Workflow Integration

Import BPMN files as templates for Workflows, so they can be finished in the Workflow Studio.

Description

BPMN Workflow Integration for
Matrix42 Workspace Management

With the help of **BPMN workflow integration** a user can import business processes modeled with BPMN (business process model and notation) quickly and easily as Matrix42 Service Store Workflow into the Workflow Studio. An administrator will subsequently provide the concrete implementation of individual workflow activities, based on the imported BPMN backbone.

Example:
1. create BPMN diagram here: https://demo.bpmn.io/new
2. export diagram as "diagram.bpmn"
3. Navigate to "Workflow Definitions" in Matrix42 Service Store.
4. call up the action "Register Workflow"
5. select your BPMN file "diagram.bpmn"
6. specify workflow name and save
7. edit workflow in Workflow Studio
8. Use Matrix42 workflow activities

Installation is done via the Matrix42 Extension Gallery.
The manual can be found here.
