## Description

### Robin Data Software

Data protection officers implement the requirements of the GDPR in a structured and practical way with Robin Data.

### Legally compliant documentation

In Robin Data you implement the legally required data protection documentation in a structured way. Thousands of templates for 250 industries and extensive training videos make it easy to get started and get the job done.

In these, Robin Data takes into account, among other things, industry-specific legal bases, deletion concepts according to DIN66398, as well as the requirements of ISO 9001:2015.

### Fulfill accountability obligations

The Activities Manager is the linchpin in your daily compliance work. Here you create and track activities via category and file number. You seamlessly document all activities over time and send tasks via email and much more.

**Digital. Secure. Multi-client capable.**

Robin Data is a modern cloud application and digitally available anytime and anywhere. Whether you are a small company, a medium-sized business or a public body, Robin Data adapts to your needs. As a (corporate) data protection officer or data protection advisor, you manage your customers conveniently and with one user via our DPO Cockpit, which is provided free of charge.

Convince yourself!
