Object Template

The object template function allows the definition and application of pre-selected attribute values for each configuration item

Description

Object Template for [Matrix42 Workspace Management](#)

The object template function allows the definition and application of pre-selected attribute values for each configuration item. Thus be defined fields already filled with default values when you create a new object. The attribute values can be defined as either fixed values or values from the result of ASQL expression. Advantages: Binding of the templates to certain configuration elements
 Flexibility through use of ASQL expressions
 Simple application of the template using form designer control
 TemplateTextBoxLink
