Matrix42 Software Asset Management with Oracle Compliance – Java Inventory

You will learn how to leverage and exploit the full potential of Matrix42 Software Asset Management with Oracle Compliance – Java Inventory. The training will be held in german.

Description

Matrix42 Software Asset Management with Oracle Compliance - Java Inventory

Learning Objectives

In our product training, you will learn how to use the full potential of Matrix42 Software Asset Management in connection with the Oracle Compliance Module for a Java compliance overview. You will learn how to identify Java installations and instances and how to map license requirements in the tool based on this.

In addition, the Java license models are explained using examples and mapped in the tool. The aim is the efficient use of the system, the establishment of data collection and transparency and accounting for your Java products (duration 1 day)

Target Groups

Business staff license management, SAM officers, IT license managers, IT controllers, business users/line managers from IT controlling/contract management or budget management, workspace management or IT administrators, ITSM process owners, Matrix42 partners

Content

- Oracle Java product overview
- Detection of licensed installations
- Commercial Java functions
- License Metrics
- Licensing of virtual environments
- Licensing of cloud environments
- Procedure for a Java audit
- Installation of the Oracle Compliance Module
- Oracle Java data collection on Windows and Linux systems and their processing

Prerequisites

Basic knowledge of how to use Matrix42 Software Asset Management and Service Management. Basic knowledge of the licensing programs and models of common vendors.

If you do not have the basic knowledge we highly recommend our [SAM License Foundation Training](#).

The training will be held in German. For basic training held in English please [click here](#).
