

## Matrix42 Marketplace Products

# MakroAccess42

MakroAccess42 is a Makro Factory solution based on the Bissantz DeltaMaster. MakroAccess42 displays the rights granted or withdrawn to / from employees within a particular period of time on a daily, weekly or monthly basis. You can also compare delta changes between two events. With MakroAccess42, Makro Factory makes an important contribution towards being GDPR compliant by quickly granting information about who has access to certain data when and how.

The associated license is a full named user license, which allows the connection of additional databases. It is also possible to create your own full-fledged reports with this solution.

The MakroAccess42 solution offered here solely supports the Matrix42 Workspace Management suite. A further connection of products by the customer is possible. An optional upgrade to the full version MakroAccess is also possible.

## Description

## Additional information

License metric	Per Installation
Manufacturer	Makro Factory GmbH & Co. KG
