EgoSecure Data Protection Specialist - Training

You get a comprehensive overview of the EgoSecure system architecture and all modules.

Description

Learning Objectives

You will receive practice-oriented training courses, which deepen specific topics concerning data protection.

The participants of the training simulate the role of the administrator after comprehensive introductions to the IT security measures, and configure specially installed computer systems. This gives you a practical insight into the methods and tools of Data Protection. Practical and theoretical units increase the handling of EgoSecure protection measures and the awareness of safety risks.

Participants will learn about EgoSecure Data Protection. This allows you to optimally adapt the security to the needs and conditions of the company. Through practice-relevant examples and exercises in small groups it is taught how to integrate the components with few steps and fully exploit the possibilities of EgoSecure Data Protection.

Target Audience

You are a system and network administrator, responsible for your company's IT system or a IT security officer.

Topics

Second day: EgoSecure Data Protection Specialist

In this training you get a comprehensive overview of the EgoSecure system architecture and all modules. The training includes theory and practice units for the following case studies:

Unit 1: Application scenarios for the control and filtering of data interfaces

Unit 2: Protection against unauthorized applications (application control, antivirus)

Unit 3: How do GreenIT and Secure Erase work in EgoSecure?

Unit 4: Case studies to protect against current threats

Unit 5: Exchange of suggestions and ideas / questions and answers

The topics can be booked separately.

First day: EgoSecure Administration Specialist

Third day: EgoSecure Encryption Specialist

Fourth day: EgoSecure INSIGHT Specialist

The trainings take place between 9am and 4.30pm. On the first day we start at 10am.

The training will be held in german.
