

Smart Service Provisioning

The AddOn "Smart Service Provisioning" offers the possibility to guarantee a faster provisioning for definable services.

Description

In the standard system, the provisioning process of services in the Matrix42 Catalog is only triggered when the entire order has been "approved".

If a purchase order contains services that do not require approval and services that do require approval, which in turn may contain different approval processes, many ordered services have to wait unnecessarily for their delivery. With this addon an early deployment is possible, for example, to carry out the provision of approval-free service directly after the order.

Smart Service Provisioning

Important hint: AddOns are implemented on the customer system by Cubefinity after ordering and coordination of dates with the customer. Therefore no downloads are stored!

Information complémentaire

AppFabric Required	No
Digital Workspace Platform (DWP) Compatibility	10.x, 11.x, 9.0, 9.1
License metric	Par installation
Fabricant	Cubefinity GmbH
Contract type	Subscription
