PRODUITS MATRIX42 MARKETPLACE

Asset History

Create transparency about the changes to devices in your company.

Description

For those responsible for hardware or financial accounting, it is often necessary to be able to track changes to devices transparently and easily. This is often difficult and only partially possible with the existing archive function.
With this AddOn, changes to the attributes

- status,
- cost center,
- location,
- organizational unit,
- main user

are logged and displayed in a clear and analyzable way. This information is stored together with the change date and a reference to the corresponding person who made the changes. In this way, you can easily track all changes.

For example, you can read out who made the assignment of a device at what time. A demand-oriented allocation of internal costs or correct booking of hardware is thus easily possible.

Information complémentaire

AppFabric Required	No
Digital Workspace Platform (DWP) Compatibility	10.x, 11.x, 12.x
License metric	Par installation

Fabricant	Cubefinity GmbH
Contract type	Subscription
