# MobileIron Connector

**MobileIron Connector** is an extension for Matrix42 Digital Workspace Management. It connects the MobileIron MDM system with the Matrix42 DWM system and it enables the transfer of the managed mobile devices and SIM cards into the WSM Asset Module.

## Description

## MobileIron Connector

The MobileIron Connector is an extension for Matrix42 Digital Workspace Management. It connects the MobileIron MDM system with the Matrix42 DWM system. It enables the transfer of managed mobile devices and SIM cards into the WSM Asset Module. This enables seamless integration into the asset processes.

### Functions

- MobileIron data provider
- Customizable configuration for multiple MobileIron systems, default asset status for new and no longer existing

  Systems
- Support of the MobileIron API V2
- Transfer of hardware information of mobile devices and SIM cards

### Advantages

- Integration of MDM data in Matrix42 Asset Management
- Use of MDM data for service desk processes
- Handover and return processes can be combined e.g. with the Field Service Operation App
- Linking of imported SIM cards with contracts

## Use cases

- Integration into the service desk processes, e.g. in case of loss of mobile hardware
- Full integration and linking of MDM assets with contracts and license management

## Recommendations for the implementation of this product

This product is delivered on a turnkey basis.
