Azure AD Manager Connector

AZURE AD Manager Connector imports Azure Active Directory manager attribute in Matrix42 Enterprise Service Management.

Description

AZURE AD Manager Connector

The manager attribute could be useful for business process and service approvals, but reading it using standard methods from Azure AD could be difficult as expanding it will return a complex object. Also, a manager could change often in some companies and for that reason, having a process that updates it automatically is very important.

This connector imports Azure Active Directory manager attribute in Matrix42 Enterprise Service Management.

Features:

- Usage of Service Connections to securely connect and read data from your Azure tenant
- High performances
- Filter settings available

- Workers Compatible
- Easy to set up (Just like Azure Active Directory / Office365 data provider)

Prerequisites:

Matrix42 Enterprise Service Management version => 11.0.2

Installation:

Install Extension – Installation and Configuration

Configuration Guide:

Azure AD Manager Connector Configuration Guide
